To whomever it may concern,

I am writing to recommend Maria Mediannikova for the Mass Bay Dual Enrollment program. I taught Maria when she was in 7th grade, for both Math and Science. Maria is an excellent student. She is diligent, focused, and hard working. I remember that she was very good at advocating for herself through asking questions both in class, after school, and via email. Maria is also a meticulous student, her work is consistently thorough and organized.

When Maria asked me to write this letter of recommendation, she shared with me that she wants to be an orthodontist. She wants to start earning college credits now to make herself a more competitive applicant when she applies to Medical and Dental programs.

Maria would be an excellent candidate for this program because she is hardworking and motivated. She can handle an increased workload and is experienced at planning ahead to make sure she has time to complete her assignments, and to do them well. She will also advocate for herself when she needs help or has questions.

Please reach out if you have further questions.

Take care,

Amanda Buck

7th grade Math and Science Teacher
